

# HVE & SE KIT 5190

## Autoclavable

### Kit Includes:

- 3 HVE Valve Assemblies
- 3 SE Valve Assemblies
- 1 HVE Swivel Quick Disconnect
- 1 SE Swivel Quick Disconnect
- 1 HVE Cleaning Brush
- 1 SE Cleaning Brush
- 1 Instructions
- 2 Extra HVE Center O-Rings
- 2 Extra SE Center O-Rings
- 1 Extra HVE Tip O-Ring
- 1 Extra SE Tip
- 1 Extra HVE Swivel O-Ring
- 1 Extra SE Swivel O-Ring

DCI Autoclavable valves are made of the finest materials available and can be sterilized by a variety of methods: steam autoclave, chemical vapor or dry heat.

**WARNING:** Failure to follow the precautions listed below will void the manufacturer's warranty.

1. Avoid use of hypochlorite solutions or bleaching agents through the instrument. Prolonged use will cause damage to this instrument.
2. Sterilization temperatures should not exceed 270 degrees Fahrenheit (132 degrees Celsius).
3. Avoid contact of the instrument to sterilizer walls or being placed in close proximity of heating elements.

## CLEANING, DISINFECTING & STERILIZING

**Cleaning:** Clean all the surfaces with a mild detergent and water solution. Thoroughly rinse with clean water. Dry with a clean, soft, lint free cloth. **Caution:** Never use abrasive cleaners or pads.

**Disinfecting:** Always follow the manufacturer's recommendation of the specific disinfectant you chose to use. Some disinfectants that will not adversely effect the performance of your vacuum valves are: BIREX SE, SPORICIDIN, COLDSPOR, PROCIDE SPRAY, STERALL SPRAY, ASEPTI-IDC, BIOCID, PROMEDYNE IODO-FIVE, WESCODYNE & CAVICIDE.

**Sterilizing:** DCI Autoclavable Vacuum Valves can be sterilized by means of Steam Autoclave, Dry Heat, Ethylene Oxide, Gas or Chemical Vapor process. Regardless of the process you choose, temperatures should never exceed 270 degrees Fahrenheit or 132 degrees Celsius.

## SERVICE

- Lubrication:\***
1. To ensure smooth lever action, lubricate center o-rings.
  2. To ensure smooth Q.D. swivel, lubricate swivel o-ring.
  3. Replace any o-ring that becomes worn, nicked or cut.

\* Always use Silicone based lubricants such as DCI #8031.
